2018 SPRING SERVICE AGREEMENT

If you want weekly services, please fill out separate weekly service contract.

2018 ORDER

PLAN A: Opening - Spring Mechanical Reassembly-Cover Removal Not Included ~~\$330.00~~ **Now \$200**

- Re-assembly of filter and pumps, including replacement of gaskets and/or seals if needed (parts not included).
- Complete water chemistry check (NOTE: Chemicals required to balance the water's chemistry are not included and will be billed accordingly.)

To avoid a second trip to start the filtration system, it is recommended that the water level be raised under your pool cover. This is required if the pool water is not at the proper level to start the filtration system. This can be done by placing a garden hose under the pool cover and raising the water level to three inches below the top of the tile. For the water level to be accurate, the cover must not have water on its surface.

- Thorough washing with an anti-microbial solution that prevents fungal/bacterial growth and eliminates odors.
- Inspection for wear, tears, holes and more.
- Up to three holes patched at no charge up to 2" in length or diameter. Any additional holes will be patched upon inspection for an additional fee. In the event that your cover must be sent to the manufacturer for repair, we will notify you and obtain your authorization first.
- This service is primarily designed for safety pool covers, but we'll store any reasonable pool cover.
- This service is developed, designed and offered as a convenience for our valued customers. PM Pool Service does not assume any responsibility for pre-existing wears, tears or holes in the cover.

PM POOL SERVICE AGREEMENT

PLAN A - The removal of covers will include hosing off debris and immediate folding for storage on the owner's premises. We cannot assume any responsibility for the tearing of any covers either due to winter damage or normal removal procedures.

PLAN B - Pool pumped out and acid washed. Stains or discoloration not removed by an application of full strength acid will be considered part of the pool coating and will not be the responsibility of PM Pool Service. PM Pool Service shall additionally open the pressure relief valves for hydrostatic water as the lowering of the water and the removal of debris permits, but shall not be responsible for pool movement due to ground water conditions. Customer shall provide for the dumping of debris and leaves within a reasonable distance of the pool. If permits or special pumping conditions are required, an additional charge will be made. The quoted prices are for a discharge rate of 360 G.P.M. within 200 feet of the deep end of the pool. Acid washing of plaster surfaces will cause mild etching of the plaster. We do not recommend acid washing in general for plaster, however, it is the only method to remove stains. All work will be performed in a professional manner, but there is no guarantee on any change in the appearance or physical characteristics of the plaster.
